

I am concerned that K-LOVE may be adversely effected by the LPFMs.

K-LOVE is a station that provides hope and a positive message in an not so peaceful, sometimes mixed up, society. I personally commute 120 miles a day for my job. I am so glad that I can listen to K-LOVE on 3 stations. When I travel out of range for one I change the channel to the other. I know that I am not the only one that does this. If the LPFMs have their way then many people will be left without this positive influence on them.
